

PRODUCT DATASHEET

GLASS REINFORCED FILAMENT TAPE

Description

Glass reinforced filament tape is a tape reinforced with glass fibers in the longitudinal Direction along with a Polypropylene backing. The Polypropylene backing provides abrasion, moisture and scuff resistance. The adhesive is formulated to adhere adequately to fiberboard and insulation surfaces.

Availability

Roll lengths 50, 150, 200 lm (roll width dependent)
Roll widths 9, 12, 15, 19, 25, 30, 38, 50 and 75 mm.

Application

Application must be easily accomplished at room temperature.

Characteristics

Backing	: Biaxially oriented polypropylene.
Adhesive	: Rubber-resin.
Colors	: Transparent.
Adhesion to steel	: 9.6 N/10 mm.
Tensile strength	: 250 N/10 mm.
Elongation	: 8.5 %
Backing thickness	: 32 microns Polypropylene.
Total thickness	: 135 microns.
Static shear	: 4500 minutes.
Temperature	: 60 C°
